

2nd ANNUAL COMPANY PROGRAM COMPETITION

One of the main aims of the Company Program is to help teams develop their ability to pitch their product, and prepare them to present to potential investors, and at the Company Program Competition, we help our teams do the same. While engaging in an academically challenging competition, the young entrepreneurs get an immersive learning experience in economic education. The 2nd annual company program competition took place on 1st October and a total of 5 teams competed.

ZAFSOFT is a neural software provider with a focus on preventative and curative solutions for the healthcare sector. ZAFSOFT's premium product is an EEG-based system that detects signs of hearing impairment in newborns. They aim to employ technologies and advancements in neural science to serve their customers better
